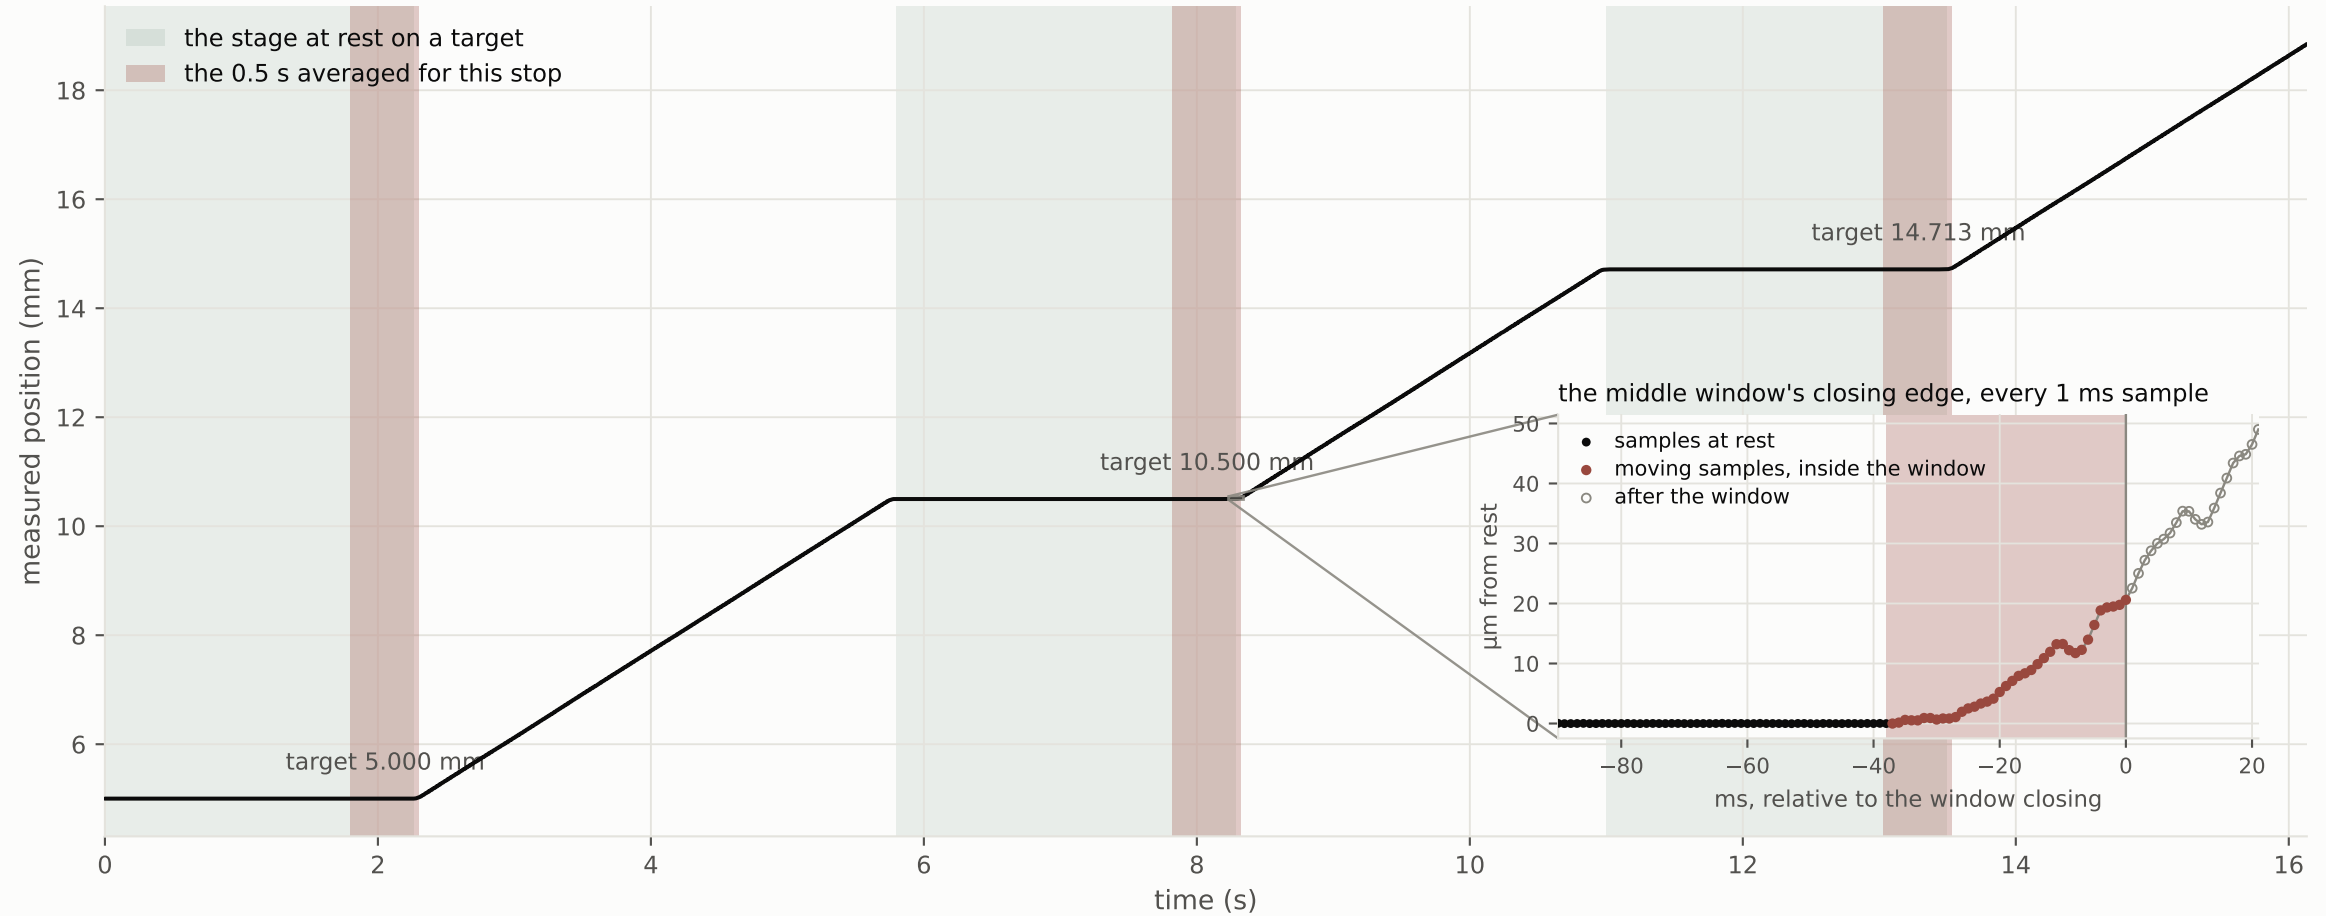
ISO 230-2 v3: which samples each measured position was averaged from

Three consecutive stops of one pass. The shaded half-second is the window the published evaluation averaged, placed on the trace by the same fitted clock it used.
ISO230-2_v3.csv · terminal_20261021_183115.log · stops 145–147 of 240, up pass


This window ends 38 ms after the stage has already left the target, so its last samples are mid-move — across all 240 stops the median is 38 ms.
