(a)
ℓ_{sat} = 2.30 µm
ℓ_0 from E2-05
nothing arrives
s_{50} = 7 µm
first half-cycle of each stroke
increasing pass
decreasing pass
below detection
lost motion $\ell = s - \Delta x$ (µm)
stroke s (µm)
(b)
all
nothing
fraction arriving $\Delta x/s$
stroke s (µm)
